Subject: **Water Board Concurrence with the November 8, 2019 Request for a Determination of No Unacceptable Soil Vapor Intrusion Risk Riley Avenue Site, Building Unit 127B Fuel Distribution System Section BR11-1 Presidio of San Francisco, California**

Dear Ms. Larssen:

I reviewed the Presidio Trust's letter, dated November 8, 2019, requesting the Regional Water Board's concurrence that there is no unacceptable health risk to the residents of Unit 127B resulting from soil vapor intrusion (VI) to the indoor air. Based on my review of the information provided in the letter, the Vapor Mitigation System (VMS; i.e., the subslab venting system, vapor barrier, and basement slab) is effectively mitigating soil VI into the indoor air of Riley Avenue Unit 127B. I concur that under current conditions there is no unacceptable health risk to residents of Unit 127B resulting from soil VI to the indoor air.

If you have any questions, please contact me at (510) 622-2375 or at jeff.white@waterboards.ca.gov.

Sincerely,

A handwritten signature in black ink that reads "Jeffrey White".
